

# HF Curemaster is the new benchmark in tire manufacturing.

## HF Curemaster TBR

HF Curemaster TBR is the new benchmark in truck tire manufacturing.

### Your Benefits:

#### Space:

- Flexible and compact footprint
- Possibility to replace older, smaller presses  
→ Potential for more presses per existing trench

#### Quality & Maintainability:

- Even distribution of squeeze force ensures optimum tire uniformity and longest mold life
- Longer life time of the hydraulic components due to maximum hydraulic pressure of only 100 bar
- Easy access to main hydraulic, pneumatic and heating components

#### Modularity:

- Press accommodates molds from 62-67"
- Modular design to meet the latest market requirements
- Customized modules offer adjustment to customers specifications and individual needs
- Built according to the latest safety, environmental and manufacturing requirements

#### Total Cost of Ownership:

- Designed to provide the lowest energy consumption
- Durable construction for longer press-life
- Meets the highest requirements for availability, performance and quality

## HF Curemaster PCR

HF Curemaster PCR offers completely new possibilities in space and cost planning for customer-specific requirements as an individual modular system.

### Your Benefits:

#### Space saving:

- No pit required – fits in all existing trenches
- Minimum floor space required – narrow design
- 52" press fits in the space of 38 - 43" mech. press

#### Transport & installation:

- Less cost for transportation
- Quick installation

#### Energy saving:

- Design minimizes energy consumption

#### Accessibility:

- Best access for maintenance

#### Performance:

- Even squeeze force distribution
- Better tire uniformity
- Common control

**LESS COST PER TIRE  
& HIGHER QUALITY.**

**OPTIONAL UPGRADE FOR ALL CURING PRESSES**

## Xplore digitalization in tire curing

- Benchmarking of machine KPIs
- Monitoring of cycle times
- Transparency in energy consumption
- Analysis of machine messages
